EDUCATION

Chandigarh University

2020 - 2024

BE in Computer Science & Engineering

CGPA: 8.19

EXPERIENCE

Tech Mahindra

Pune, India

Associate Software Engineer

Nov 2024 – Present

- Developed **40+ RESTful API endpoints** using **Node.js** and **Express** for driver management, payment processing, and route optimization modules across the delivery platform.
- Integrated **Stripe Connect API** for automated driver payment system, implementing **webhook handlers** for real-time payment confirmation and reconciliation of driver payouts.
- Built **AWS S3 integration** with **pre-signed URLs** for secure storage and retrieval of prescription documents and proof-of-delivery images, reducing **server load by 40%**.
- Implemented **Beans AI route optimization** integration with **webhook-based delivery tracking**, enabling real-time status updates and improving **delivery efficiency by 25%**.
- Designed **JWT-based authentication** and **role-based access control (RBAC)** system supporting multiple user types including **Admin, Pharmacy, and Driver roles**.
- Created **middleware components** for request validation, error handling, and logging, reducing **API errors by 35%** and improving system reliability.
- Collaborated with **frontend developers** to define API contracts and comprehensive documentation using **Postman**, facilitating seamless integration across modules.

SKILLS

Languages: JavaScript, Java, SQL, Typescript

Technologies: Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, Redis

Infrastructure & DevOps: Docker, Kubernetes, Google Cloud, AWS, Git

PROJECTS

TaskFlow - Task Manager, Node.js, Express.js, MongoDB, JWT, OAuth 2.0

[GitHub Link](#)

- Architected and developed **RESTful APIs** using **Node.js** and **Express.js** with **MVC pattern**, implementing **12+ secure endpoints** for authentication and task management operations.
- Implemented **dual authentication** using **JWT tokens** with **bcrypt hashing** and **Google OAuth 2.0** via Passport.js, ensuring secure user credential management.
- Built advanced query features including **regex-based search**, **multi-field filtering**, and **server-side pagination**, reducing API response payload by **40%** and improving performance.
- Designed **MongoDB schemas** using **Mongoose ODM** with proper indexing and relationships, implementing **aggregation queries** for real-time task statistics and overdue tracking.
- Developed **custom middleware** for **token validation**, **route protection**, and **centralized error handling**, achieving **100% coverage** on private endpoints.

Pair Code - Developer Platform, Node.js, WebSockets

[Live Link](#)

- Facilitates **real-time** code synchronization across diverse **programming languages**, enabling seamless team collaboration.
- Features an in-built compiler, allowing users to **Compile and Run** code directly within the platform.

ACHIEVEMENTS

- Solved Over **300+ Coding Questions** on Platforms like [LeetCode](#).
- Mentored over **1k+** students on HLD & Resume Writing at **Google Developer Student Clubs** and **Alexa Community**.
- AWS Certified Cloud Practitioner** – Amazon Web Services, 2025
- Google Associate Cloud Engineer Certification** – Google Cloud, 2025
